MEMORANDUM FOR: Director of Regional & Political Analysis
Director of Economic Research
Director of Strategic Research
Director of Scientific Intelligence
Director of Weapons Intelligence
Director of Geographic & Cartographic Research

FROM :
Special Assistant-NIO Support

SUBJECT : Contributions to the DCI's Annual Report

1. As I mentioned at the NFAC Staff meeting on 19 October, we have received the IC Staff's request for our contributions to the DCI's Annual Report. I would appreciate any information your office can supply on the two attached requests. The request on long-range forecasting for intelligence should be read to mean: what are you doing to determine what the world will look like in eight to twenty years and which could be used to help Intelligence Community planners make decisions on the allocation of resources, such as selecting collection systems for development.

2. May I please have your contributions by the end of the month so they may be combined with contributions from other offices, reviewed by Messrs. and Bowie, and sent on to the IC Staff.

3. We will subsequently have an opportunity to review the IC Staff's draft report.

12 October 1977

TO: D/DCI/NI

1. Preparation of the 1978 DCI Annual Report on the Intelligence Community is now underway. You are requested to provide a draft segment on the following topic for possible use in the Report:

Interdisciplinary Analysis. The state of the art, to include techniques in use or under development to enhance capability to perform analysis of this type, principal applications and results attained, organizational changes designed to enhance the capability, research in progress (in house or on contract), other aspects of interest.

2. Versions of the Report are contemplated at several levels of classification. Your input may be Top Secret Codeword or lower level as appropriate. Please indicate the classification of each paragraph in the text.

3. Illustrative, graphical or tabular material may be included as appropriate, and may be submitted in draft form.

4. Questions may be directed to

[redacted]

TO: D/DCI/NI

1. Preparation of the 1978 DCI Annual Report on the Intelligence Community is now underway. You are requested to provide a draft segment on the following topic for possible use in the Report:

Long-Range Forecasting for Intelligence. Description of efforts underway or planned, either in-house or on contract, and plans for utilizing the results for planning and programming. Give examples of successful efforts during past year, provide rationale for the effort, and describe other aspects you consider of importance.

2. Versions of the Report are contemplated at several levels of classification. Your input may be Top Secret Codeword or lower level as appropriate. Please indicate the classification of each paragraph in the text.

3. Illustrative, graphical or tabular material may be included as appropriate, and may be submitted in draft form.

4. Questions may be directed to

MEMORANDUM FOR: NIOs

SUBJECT: NIO Representation at the Evening PDB Meeting

Only two of you expressed any interest in having a regular representative--rotational or otherwise--at the PDB meeting. Dick Lehman has, therefore, decided that you should get in touch with him individually when you have comments on PDB draft articles, which was what the majority of you preferred.
